1. Agenda 2021/2030 Explained In 2 Minutes And Why Its Important

For the last year people have been focused in on Covid with every country around all the world experiencing some kind of lockdown in one shape or another. Covid is only one piece of the jigsaw. 🧵 1/23

2. Another very big piece is Agenda 2030 formerly known as Agenda 2021. It's hard to explain succinctly in a 📌 so I've turned to a 2 minute interview that Spiro Skouras did with Rosa Koire. Spiro had 60k follower on Twitter until he was deplatformed last year.

3. Many people may not have heard of Rosa Koire, she is however the foremost expert in UN Agenda 2030 having written a book on it. I actually bought one of her books “Behind The Green Mask: UN Agenda 21” in September of last year.

amazon.co.uk/Behind-Green-M...

4. So let's have a brief look at what everyone thinks UN Agenda 2030 is and how it is portrayed to the public and then we will look at what it really is. This is taken directly from the UN website.

SUSTAINABLE DEVELOPMENT GOALS

5. "This Agenda is a plan of action for people, planet and prosperity. It also seeks to strengthen universal peace in larger freedom. We recognise that eradicating poverty in all its forms and dimensions, including extreme poverty, is the greatest global challenge and an..

6. ..indispensable requirement for sustainable development. All countries and all stakeholders, acting in collaborative partnership, will implement this plan. We are resolved to free the human race from the tyranny of poverty and want and to heal and secure our planet...

7. We are determined to take the bold and transformative steps which are urgently needed to shift the world onto a sustainable and resilient path. As we embark on this collective journey, we pledge that no one will be left behind.

8. The 17 Sustainable Development Goals and 169 targets which we are announcing today demonstrate the scale and ambition of this new universal Agenda. They seek to build on the Millennium Development Goals and complete what these did not achieve.

9. They seek to realize the human rights of all and to achieve gender equality and the empowerment of all women and girls. They are integrated and indivisible and balance the three dimensions of sustainable development: the economic, social and environmental

10. The Sustainable Development Goals (SDGs) or Global Goals are a collection of 17 interlinked global goals designed to be a "blueprint to achieve a better and more sustainable future for all".

11. The SDGs were set up in 2015 by the United Nations General Assembly and all these 17 Sustainable Development Goals are intended to be achieved by the year 2030. They are included in a UN Resolution called the 2030 Agenda or what is colloquially known as Agenda 2030.

12. The 17 SDGs are: (1) No Poverty, (2) Zero Hunger, (3) Good Health and Well-being, (4) Quality Education, (5) Gender Equality, (6) Clean Water and Sanitation, (7) Affordable and Clean Energy, (8) Decent Work and Economic Growth, (9) Industry, Innovation and Infrastructure,

13. (10) Reducing Inequality, (11) Sustainable Cities and Communities, (12) Responsible Consumption and Production, (13) Climate Action, (14) Life Below Water, (15) Life On Land, (16) Peace, Justice, and Strong Institutions, (17) Partnerships for the Goals.

14. Now that all sounds very positive and for the greater good but what is it really. Here is what Rosa Koire had to say.

15. "Agenda 21 is the action plan, it's the blueprint, the comprehensive plan that was signed onto by 178 nations plus the Holy See in 1992, it's the United Nations Plan.

16. It's the plan to inventory and control all land, water, plants, minerals, construction, means of production, food, energy, everything on the planet, law enforcement, education, information and human beings.

17. So this is a comprehensive plan of action, an inventory and control plan. It's about data sharing, it's about money, transferring from the developed nations to the lesser developed nations and ultimately it's about destroying your ability to have a voice..

18. ..to have a representative government. It's about changing your government to governance & taking away your voice, entirely destroying your ability to be free and to be independent & the goal of course is to transfer power from local individuals to global governance systems.

19. So you can't do that all at once and it's been a long process and you see it as exactly as you are seeing it right now. It's a plan to disrupt and destroy the existing system, it's a plan of transformation and control and that's what we are living through right now.

20. What is happening now is that the technology has caught up to the plans of these people. They've always had these same plans, that there is literally nothing that holds these people back.

21. So when they have the technological ability and you look at the 4th Industrial revolution or whatever it is they want to call it. They are talking about total digital connectivity and a new social contract"

22. Helluva difference between how it is being sold to the public and what it really is. The best way of describing it is "mutton dressed as lamb". Expect to see this and Covid moving towards climate change as part of getting UN Agenda 2030 implemented.

23. You know the drill 😊. I write these 🧵 in my spare time and would really appreciate if you could retweet the very 1st tweet. Likes are great but retweets are required to reach as large an audience as possible to expose what is really going on behind the scenes. Many thanks.
