1. "Have We Been Subjected To Predictive Programming Prior To Covid ?"

First things first what is predictive programming ?

New 🧵 1/27

2. According to Ohio State

“Predictive Programming is theory that the government or other higher-ups are using fictional movies or books as a mass mind control tool to make the population more accepting of planned future events”

Sounds awfully like a Conspiracy theory ?

3. So we can debunk that straight away, can't we ?

This quote has come from a reputable university so they must be right. Here's the problem though.

Ohio State has been funded by BMGF so will have their interests at heart and will debunk anything that questions the narrative.

GRANTEE Ohio State University	DIVISION Global Health	DATE NOVEMBER 2010	REGION SERVED GLOBAL	COMMITTED AMOUNT \$100,000

4. Researcher Alan Watt who passed away this year more accurately described it

“Predictive programming is a subtle form of psychological conditioning provided by the media to acquaint the public with planned societal changes to be implemented by our leaders. If and when...

5. these changes are put through, the public will already be familiarised with them & will accept them as natural progressions, thus lessening possible public resistance and commotion.”

Understanding The Control is quite brilliant (listen after the 🧵)

[youtube.com/watch?v=h55Ou6...](https://www.youtube.com/watch?v=h55Ou6...)

6. Predictive programming normally is utilised through Books, TV Shows, Movies and Musicians.

Let’s take a look at some that have happened starting in 1981 right up to 2020.

7. Back in 1981 the horror writer Dean Koontz wrote a book called Eyes 👁️ Of Darkness. It was a plot with details of a military conspiracy to spread a virus 🦠 named Wuhan 400

biological... know how the hell Danny wound up in this place.”
“To understand that,” Dombey said, “you have to go back twenty months. It was around then that a Chinese scientist named Li Chen defected to the United States, carrying a diskette record of China’s most important and dangerous new biological weapon in a decade. They call the strain ‘Wuhan-400’ because it was developed at their RDNA lab outside of the city of Wuhan, and it was the four-hundredth viable strain of man-made microorganisms created at that research center.”
“Wuhan-400 is a perfect weapon. It afflicts only human beings. No other living creature can carry it. And like syphilis, Wuhan-400 can’t survive outside a living human body for longer than a minute, which means it can’t permanently contaminate objects or entire places the way anthrax and other virulent microorganisms can. And when the host expires, the Wuhan-400 within him perishes a short while later, as soon as the temperature of the corpse drops below eighty-six degrees Fahrenheit. Do you see the advantage of all this?”
“I don’t know, Danny. I don’t know how to think about what Carl

8. Sylvia Browne in her 2008 book "End Of Days" wrote of a severe pneumonia that would appear in 2020 then vanish. Movies and TV shows however is where predictive programming gets the best bang for the buck.

extremely contagious disease, and its victims will be quarantined until it's discovered that the bacteria can be destroyed through some combination of electrical currents and extreme heat.

- In around 2020 a severe pneumonia-like illness will spread throughout the globe, attacking the lungs and the bronchial tubes and resisting all known treatments. Almost more baffling than the illness itself will be the fact that it will suddenly vanish as quickly as it arrived, attack again ten years later, and then disappear completely.

Strides in mental health in the first half of this century will be extraordinary, virtually eliminating the majority of the disorders

9. In the famous 1984 (note the date) 🌀 Temple of Doom movie there was a character called Wu Han who was an Indiana Jones sidekick. The particular scene he appeared in was set in Shanghai, China in 1935 where he is shot dead. Watch at 4min

K.W. Matterhorn 3 weeks ago (edited)

min 3:00 this ENTIRE scene is a mind-blowing metaphor for 2020... we got the US, Europe (Short round =Japan) and trusty old Taiwan sitting across the table from... "the poison works fast Dr. Jones"

10. The Simpsons have frequently been used to inform people of what is coming down the track. Being such a popular show many would have tuned in weekly.

In 1993 episode there was a viral outbreak of the Osaka flu with people fighting over a placebo cure

youtube.com/watch?v=zspGAl...

11. In a 2000 episode called “Bart to the Future”, Trump is predicted as President and an adult Lisa Simpson is depicted as the 1st incoming female president of the US. Lisa also predicted what Kamala Harris was going to wear on Joe Biden's inauguration

youtube.com/watch?v=UlvYiT...

12. In a 2004 episode Bart utters the immortal words “See you later inoculator” when his Doctor tries to give him the jab to which the Doctor replies “he can run but nobody escapes the needle”

youtube.com/watch?v=V_bfE5...

13. In a 2010 episode they predicted a phony cat flu crisis, a made up disease that would last all the time even throughout Summer. They even refer to the media as the centre of disease disinformation.

youtube.com/watch?v=ZPrh-1...

14. Other shows get included as well. In a 2003 episode of The Dead Zone called Plague, in this mashed up clip we see lockdowns, masks, swabs, hazmat suits and coronavirus originating in China. Best of all is the fact that khloro 🧑🏻‍🔬 😊 is the cure.

youtube.com/watch?v=riPgme...

15. In Are We There Yet? titled The Quarantine Episode, that debuted in 2012, Ice Cube's character explains, while under government stay at home orders, that the "Monkey Flu" is a government drill...

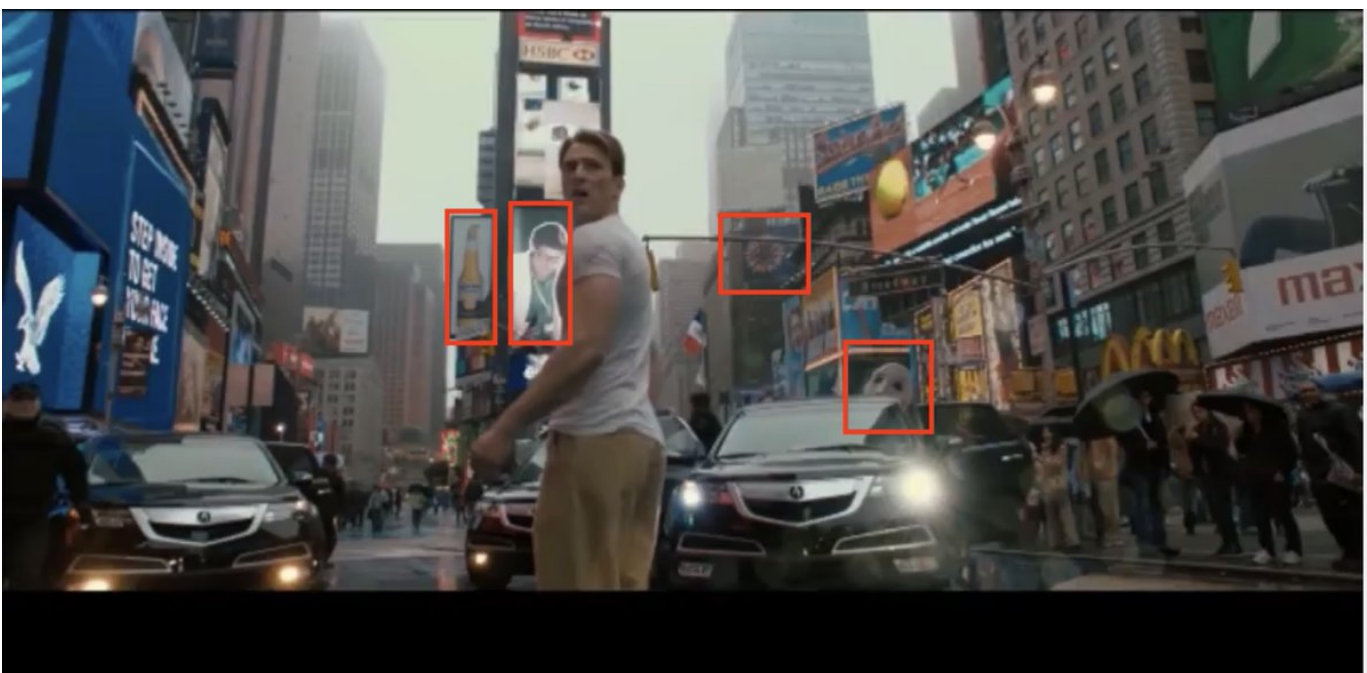

16... and that it is being used to test the emergency response systems, and to see how well the populace obeys their commands even mentioning H1N1, SARS and Bird Flu...

youtube.com/watch?v=bKYFrz...

17. 2012 Hollywood blockbuster Captain America 1st Avenger was also used to predict events. In the final scene of the movie we see Captain America in Times Square.

youtube.com/watch?v=gZa82X...

18. If you look carefully you can see corona beer, coronavirus, a mask, and best of all what looks like Bill Gates dressed up as a doctor.

19. In V for Vendetta the main protagonist always wears a mask. The scene which happens at 1hr 33mins into the movie is very telling.

In it see if you can recognise the storyline and any of your favourite movie villains. I've included the script below

Our story begins, as these stories often do with a young, up-and-coming politician. He's a deeply religious man and a member of the Conservative Party. He's completely single-minded and has no regard for the political process.

The more power he attains, the more obvious his zealotry and the more aggressive his supporters become. Eventually, his party launches a special project in the name of national security. At first it's believed to be a search for biological weapons and it's pursued without regard to its cost. However, the true goal of this project is power. Complete and total hegemonic domination. The project, however, ends violently.

But the efforts of those involved are not in vain for a new ability to wage war is born from the blood of one of the victims. Imagine a virus, the most terrifying virus you can and then imagine that you alone have the cure.

But if your ultimate goal is power, how best to use such a weapon? Well, it's at this point in our story that along comes a spider. He's a man seemingly without a conscience for whom the end always justify the means.

He suggests that their target should not be an enemy of the country but rather, the country itself. Three targets are chosen to maximise the effect of the attack. A school, a tube station and a water-treatment plant. Several hundred die within the first few weeks.

Three Waters has, in fact, been contaminated. Authorities are attempting to control its deadly spread, sent destruction through the underground. Fuelled by the media, fear and panic spread quickly fracturing and dividing the country until, at last, the true goal comes into view. Before the St. Mary's crises no one would have predicted the results of the election that year.

No one. And then not long after the election, lo and behold, a miracle. Some believed it was the work of God himself. But it was a pharmaceutical company controlled by certain party members that made them all obscenely rich.

A year later, several extremists are tried, found guilty and executed while a memorial is built to canonize their victims. But the end result, the true genius of the plan, was the fear. Fear became the ultimate tool of this government.

20. But it isn't just tv series and Hollywood blockbusters that are used. In 2016 in Trevor Noah Comedy Central's The Daily Show he talks about a total economic collapse and the dollar being worthless....

21. ...China owns America after Trump's trade deals, people are in masks rioting, and the police have been disbanded and replaced by technology.

He also says "I miss having a live audience"

[youtube.com/watch?v=bvhqTN...](https://www.youtube.com/watch?v=bvhqTN...)

22. Popular reality TV shows are also a great vehicle to get the message across. In Project Runway a contestant called Kovid made a red plaid suit with an accompanying face mask in the 2019 season

[independent.co.uk/arts-entertain...](https://www.independent.co.uk/arts-entertain...)

23. In May 2019 Madonna performed at the Eurovision. The performance was full of imagery, symbolism & masked dancers collapsing.

The following month she released an album called Madame X. On the back of the album you can see a Corona typewriter. [youtube.com/watch?v=VG3Wki...](https://www.youtube.com/watch?v=VG3Wki...)

24. It wasn't only Madonna who used the Corona typewriter. Tom Hanks was the 1st celebrity to get Covid & in an Instagram post he posted a picture of the typewriter.

Hanks then donated the typewriter to a boy called Corona DeVries
[instagram.com/p/B92X8mjh159/...](https://www.instagram.com/p/B92X8mjh159/)

‘Corona, you got a friend in me’: Tom Hanks writes to bullied eight-year-old

Actor gives Corona typewriter to boy who sent good wishes to recovered actor and his wife

© Fri, Apr 24, 2020, 08:28

Tom Hanks has sent a letter and a Corona-brand typewriter to an Australian boy who wrote to him about being bullied over his name, Corona.

Corona De Vries, an eight-year-old from the Gold

25. Probably the most famous of all was the London Olympics in 2012. Also full of symbolic gestures and imagery.

Nurses dancing, Boris Johnson sick, a virus sweeping the world and children being targeted. Go to the 47 min mark and watch really carefully youtu.be/4Asoe4de-rI

26. I have only scratched the surface here. There are so many more examples that I could have used but there are only so many hours in the day.

Thanks to those who suggested ones I haven't included. If this 🧵 is popular and retweeted a lot I will look at doing a Part 2 soon.

27. You know the drill 😊 I write these 🧵 in my spare time and would really appreciate if you could retweet the very 1st tweet. Likes are great but retweets are required to reach as large an audience as possible to expose what is really going on behind the scenes. Many thanks
