1. Who Is Irishman Dr Mike Ryan, The Executive Director Of The World Health Organisation ? 🧵 1/21

Many of you will be familiar with Dr Ryan. He has frequently appeared in TV clips and has been beamed into millions of households not only in Ireland but around the world.

2. Originally from 🇮🇪 he has practically spent his whole working life within the WHO and has risen up through the ranks. The most important fact to note though is that he has worked with The Bill & Melinda Gates Foundation who are also the 2nd biggest contributor to the WHO.

3. The BMG Foundation since 2004 has funded the WHO 993 times. Whatever that amount of money comes to Dr Ryan knows where his bread is buttered. He better do as he is told or else.

AUGUST 1, 2009

World Health Organization**Purpose:** to prevent increases in tobacco use in Sub-Saharan Africa by providing technical assistance, mobilizing resources, and building capacity to implement tobacco control interventions through...

4. Also of note is the fact that he is the face of the WHO. To be brutally honest Dr Ryan is not exactly a picture of health. For somebody in such a prestigious position you would assume the front person would be at the very least “healthy looking”.

5. I would have thought the clue lies in the H of the WHO which stands for HEALTH. Being a Doctor he would also know the importance of healthy eating and the role it has to play in recovering if you get COVID.

6. Never once has that been mentioned by the WHO in any of the press conferences that have been given. The majority of these underlying health conditions could have been improved by making these most basic of recommendations.

7. You can also be sure he knows about the role of Vitamin D in keeping people healthy. After all he is a Doctor. We have also heard no mention of the 2 drugs that have been used successfully in the treatment of COVID. Wonder why ?

8. Maybe that has something to do with new  being launched which could only have got emergency use approval if the other 2 drugs couldn't treat COVID.

Dr Ryan first shot to prominence back on October 19th 2020 at Event 201.

9. Partners involved in Event 201 were The Bill & Melinda Gates Foundation, The World Economic Forum and The Johns Hopkins Center for Health Security (funded by the Rockefeller Foundation)

10. 6 weeks before the outbreak at 201, Dr Ryan said

“The scenario you are presented with this morning could easily become one shared reality one day. I fully expect that we will be confronted by a fast moving highly lethal pandemic of a respiratory pathogen”

How did he know

11. In March 2020, the same Dr Ryan basically said "We're coming to your house, seizing your children and "isolating" them in a safe and dignified manner" Not a good idea Mike. People don't respond well when you threaten to take their kids

[foxnews.com/opinion/tucker...](https://www.foxnews.com/opinion/tucker...)

12. Back on June 16TH 2020 he even said “The worst thing that can happen now for the economy is not an extension of the current lockdowns, its a repeated series of lockdowns done in an uncoordinated way. That would be more damaging to the economy in the long run”

13. He knew back then and he knows now. And look where we are.

[youtube.com/watch?v=9BIVYp...](https://www.youtube.com/watch?v=9BIVYp...)

14. In November good old RTE got Mike on the blower for an interview. He uttered these famous words ‘We don’t want to see a third wave, massive closures and lockdowns, and our hospitals under pressure.’

15. Word in your ear Mike. We didn’t even have a second wave and the hospitals were never under pressure. We had a casedemic. The media would never lie about that of course.

Dr Mike Ryan of the World Health Organization says there is a risk that the numbers will bounce back when society opens up. 'We don't want to see a third wave, massive closures and lockdowns, and our hospitals under pressure.' | Read more: bit.ly/3nX08zK

16. He also said there was a “risk that the numbers will bounce back when society opens up”

There is a risk when you constantly test the same people multiple times and increase the PCR level to 45. When you want to reduce the numbers, just dial it back. It's not rocket science.

17. On December 29th 2020, we got what can only be called a “veiled threat” from Dr Ryan where he said this pandemic is “not necessarily the big one”. Does he know something we don't ?

[irishtimes.com/news/health/co...](https://www.irishtimes.com/news/health/co...)

18. Many organisations seem to think that he is doing a great job. Trocaire, an Irish charity recently awarded Dr Ryan an international award for his work with the WHO. 🙄

irishpost.com/news/irishman-...

19. Most recently Dr Ryan has said that "it is all our interest to ensure that we support poorer nations in receiving vaccines".

This has nothing to do with caring about poorer nations.

Gene Kerrigan
@GeneKerrigan

It's not enough to be proud of this man, or to cheer his words. Is there one Minister with the guts to publicly propose that this becomes Irish government policy?

20. We can see how the WHO has failed them over the years. This is just posturing and trying to portray the WHO in a positive light. The reality is they are in bed with Big Pharma and dance to their tune as well as the The Bill & Melinda Gates Foundation.

21. In the years to come Dr Ryan will not come out of this "pandemic" smelling of roses. He has done more harm than good. He is yet another Irishman who has given his country a bad name. And that list is not a short one.
